

Eye! Eye! Eye!

WHY DIANE LANE MAKES YOU SEE RED

RED ALERT for red-hot Diane Lane! The sexy Nights in Rodanthe siren consistently has a shocking devilish glow in her left eye in photos taken on different days and from varying angles - even though modern camera technology eliminates the "red-eye" effect. The medical experts who studied our pictures say the bizarre reaction Lane's pupil has to a camera flash is a warning sign that she

has something wrong with her eye. And she does! So exactly what's up with Lane's left peeper? The 43-year-old beauty, who's wed to Josh Brolin, 40, got hit in the eye by a tennis ball when she was 15 years old, "leaving the pupil permanently dilated," says ophthalmologist Dr. Cary Silverman of East Hanover, N.J.
